

Turning ON/OFF Debit Card

You must be logged into Internet banking to turn on/off your debit card. Under the Welcome, Customer Name there is a link called **Card Management**

Welcome, Customer

Card Management

Click the Card Management link and it opens up a window that displays a Peoples Bank Debit card and it displays the last 4 digits of your card number. Under status you will click on the green card to turn off your card. It will turn red and display an X and that the card is OFF.

When your card is turned off it only effects any future one time charges to your account. Any preauthorized debit card transactions and any recurring debit card transactions will continue to post.

This feature give you the flexibility you to turn your card off and back on should it be temporarily misplaced or you may want to turn it off and on as you need it.

If your card is lost or stolen, turn your card off and follow-up with a phone call to the bank to let us know that we need to close your card.
